Parents, Guardians, and Community Members –

The Zuni Public School District follows the protocols set forth by the New Mexico Department of Health. ZPSD is a member of the New Mexico Health Alert Network (HAN). As members, we receive up to date information on the possible spread of the “coronavirus” to our district schools. The health staff and Director of Health participate in the statewide HAN webinars for updates and to ask questions specific to our concerns.

ZPSD disseminates HAN information to all schools immediately. Information for Health Care Providers is also addressed - to keep our health care staff current on public health provider recommended protocol for their safety and that of a suspected infected person.

ZPSD has provided parents information on the COVID-19 virus and how to communicate with their children about the Coronavirus on the Zuni Public School District website.

The schools have put up information on how to wash hands and reduce the spread of any type of viral infection. Students are being taught and reminded of the proper way to wash hands, cough, sneeze, and to stay home when they are sick with fever. Additional disinfectant wipes and spray have been made available to classrooms.

ZPSD will update families re: any preventative measures that need to be taken using SchoolMessenger, the ZPSD Website, and the ZPSD Facebook account. This would include information on school closure and continuity of education via technology – computers, email, cell, face book, if necessary.

Thank you for your care, concern, and trust in Zuni Public School District.
